ROOM HEATER, BOILER, INSERT & CASSETTE STOVES

WELCOME TO

HENLEY STOVES

Henley Stoves is one of Ireland's leading stove companies based in County Kerry, with an extensive background in the stove industry.

The core aim at Henley is to provide a genuine quality product at affordable prices, coupled with best in class customer service.

Our customers are our priority, so we strive to provide them with a quality experience when it comes to purchasing a new stove for their home.

All Henley Stoves are manufactured to the highest possible standard & two Quality Control managers complete a 32-point checklist on each stove before it leaves our factory in County Kerry.

BERTONERI

Henley Stoves is also the producer of the Bertoneri Collection of Stone, Marble Surrounds & Fireplace Accessories.

At Bertoneri, we do the easy bit, carefully crafting and shaping what nature has created into a beautiful fireplace for your home.

Our collection of stone and marble fireplaces features the latest in contemporary design as well as traditional and classical favorites.

Ask your Local Henley Stockist about the 2018/2019 Bertoneri Fireplace Collection Today!

6

Arklow - Room Heater - Insert

The Arklow insert room heater stove is a new addition to the Henley range. It is a fully cast iron stove with over 79% efficiency. Its convection based technology creates unrivalled constant warmth in your room.

The Arklow 5kW has been tested with distance to combustibles of 300mm to the top, which makes it suitable for use with most timber surrounds.

Each timber surround can be finished with different grades of varnish. Henley stoves cannot guarantee that some timber surrounds will not warp, shrink or split.

As each installation is unique to the property, some timber surrounds may get too hot & will need to be replaced.

44

Achill - Boiler - Insert

The Achill multi fuel Insert boiler is capable of heating up to 9/10 single radiators on the 17.1kw and 13/14 single radiators on the 21kw. It is primarily designed to heat water to radiators. In some cases if the stove is running too many radiators, the heat output can vary from 2 to 5.1kW heat output to room.

We would strongly recommend that a radiator is fitted in the room where the stove is installed, to maximize heat output to the room.

Porto Stove Door

- It is believed that up to 80 to 85% of the heat in a room can be lost through an open fireplace.
- Imagine how much heat you could harness if you could contain it properly.
- The Porto stove door is a DIY fire front that stops heat escaping up a chimney with a back boiler system.
- As well as preventing heat loss, the Porto Stove Door will improve the efficiency of your back boiler as well as allowing you to control the burn rate of your open fire.
- The Porto Door also has the advantage of preventing the unhealthy spillage of smoke into the room when a door or window is opened.
- When the fire is not lit they reduce the flow of air as the chimney space is covered by the unit itself.

It can be fitted into most standard 16" and 18" fireplace openings.

Porto Stove Door Dimensions

Icon Keystone

- Room Heater Stoves - 5 Year Warranty
- 1 year standard manufacturers warranty as in accordance with EU regulations.
- 2 year standard Henley warranty
- 2 year extended Henley warranty will be added if stove warranty is registered online within first 3 months of purchase of your new Henley room heater stove

A Henley stove with this icon features a tertiary air system. This creates a cleanburn system where hot air is pushed into the firebox above the normal height of the fire. This allows the excess gasses to combust given a cleaner burn.

A Henley stove with this icon is approved for Smoke Control Areas. If you are in a Smoke Control Area then you can only burn authorised fuels (generally just smokeless fuels, although the list is available from DEFRA).

All Henley stoves come with an airwash system which helps to keep the glass clean. It uses a specially placed vent or vents to draw in air from the outside to which will wash over the front of the glass.

A Henley stove with this icon is a boiler stove which comes with a thermostat control. This regulates the amount of air released into the stove until it reaches the optimum temperature and automatically closes.

A Henley stove with this icon are DEFRA exempt and have been fully tested to this standard. A DEFRA exempt stove can be used in a Smoke Control Area whereas a non DEFRA stove cannot.

European standard of test for stoves fired by solid fuel. Incorporating corrigenda September 2003, June 2006 and August 2007

A Henley stove with this icon has an external air facility allowing the air to come directly from outside your building rather than through a vent in the room. This is required for heat recovery systems in new build projects.

Stove & Fireplace Accessories

Henley Stoves Complete Range of Accessories for all our Wood Burning & Multifuel Stoves

Ceramic Fibre Insulation - 7M

Aluminium Foil Tape - 50MM

Heat Resistant Gloves

Thermal End Sealing Tape - 25mmx10m
